

Use the same cleaning technique as for a conventional manual toothbrush. Dentists recommend brushing teeth at least 3x a day for two minutes.

The practical change system enables you to replace the brush head at the latest after 3 months of use (recommended by dentists).

The TRISA Sonicpower is available with a rechargeable battery or with replaceable batteries.

The replaceable brush heads containing recycled plastic are an active contribution to the environment.

THE SONIC TOOTHBRUSH FOR EXTRA CLEAN TEETH

The TRISA Sonicpower combines the comfort of use of a manual toothbrush with the advantages of a sonic toothbrush. Sonic vibrating bristles allow extremely effective teeth cleaning while protecting the gums in the best possible way. Developed and manufactured in Switzerland.

PRO INTERDENTAL

Interdental filaments in combination with high frequency sonic movements enable an up to 9 times better cleaning in interdental spaces.*

The longer interdental filaments clean deeply in the interdental spaces. The shorter cleaning filaments thoroughly remove plaque from tooth surfaces.

COMPLETE PROTECTION

The innovative «Complete Protection» brushing surface in combination with high frequency sonic movements cleans more than 30 per cent more efficiently.*

The scientifically developed «Complete Protection» brushing surface removes plaque with high efficiency and protects teeth as well as gums.

* in comparison to conventional manual toothbrushes (ADA toothbrush)
