

SPACE BRUSH

TRISA's innovative Space Brush is a flexible, non-metallic interdental brush for gently cleaning the interdental spaces. The soft functional tip allows the brush to be easily introduced into the interdental spaces. The unique TRISA triangular bristle arrangement protects the gums and ensures dedicated cleaning of the problem areas. The polishing lamellae ensure deep cleaning and help remove food residues and stains.

DENTAL STICKS

MADE FROM FSC-CERTIFIED BIRCH WOOD

The popular TRISA dental sticks remove food residues from between the teeth. The characteristic triangular shape of the dental sticks ensures thorough cleaning. At the same time this shape helps prevent damage to the gums that could occur with round dental sticks.

TONGUE CLEANERS

TRISA's tongue cleaners reliably remove bacteria and metabolic residues from the tongue, which are responsible for bad breath. TRISA's tongue cleaners impress by being easy and pleasant to use after cleaning the teeth, ensuring long-lasting fresh breath. Also available in a compact version with smaller cleaning elements.

Interdental cleaning

Finest Swiss Oral Care 

DENTAL FLOSS

Dental floss is a handy product for cleaning interdental spaces, especially for those who have a slight tendency towards inflammation of the gums (gingivitis), and whose interdental spaces are too narrow for interdental brushes. Dental floss helps counter the formation of new plaque and discolouration. TRISA offers a comprehensive range of floss for all needs.

NATURAL CLEAN

- Floss is coated with vegetable wax and consists of 99% castor oil, a renewable resource
- The box is made of 85% recycled plastic
- Helps to inhibit the formation of plaque and discoloration
- Mint flavor

COMFORT EXPANDER + Xylitol

- The dental floss expands during use to provide particularly gentle cleaning between the teeth
- Especially suitable for sensitive teeth and gums
- Suitable for all larger interdental spaces
- Mint flavour

EASY WAXED + Xylitol

- Dental floss with a fine coating of wax for easy entry into the interdental spaces
- Suitable for all interdental spaces
- Mint flavour
- Also obtainable in the practical **Travel Version (10m)**

CHARCOAL + Xylitol

- Waxed, activated charcoal dental floss
- Cleans interdental spaces efficiently and helps remove plaque and food residues
- Helps eradicate superficial discoloration in the interdental spaces
- Suitable for all interdental spaces
- Mint flavour

EXPERT FLOSS

- Expanding dental floss
- Specially developed for large interdental spaces, braces, bridges and implants
- The strengthened ends enable the floss to be inserted precisely
- The fluffy dental floss expands during use and adapts itself to the different sizes of the interdental spaces
- Mint flavour

SUPER SLIDE + Xylitol

- Especially flat dental floss (tape)
- Smooth, wide surface for efficient cleaning
- High tear resistance
- Suitable for particularly narrow interdental spaces
- Mint flavour

INTERDENTAL BRUSHES

TRISA's interdental brushes are especially efficient when cleaning the interdental spaces and are ideal for getting to hard-to-reach areas. TRISA's interdental brushes impress with their ultra-soft bristles in the entry zone, the flexible handle for optimum accessibility and the practical hygienic protective cap, which also serves to extend the handle. As not all interdental spaces are of the same size, TRISA offers a variety of brush diameters. When choosing the

size, make sure that the interdental brush completely fills the interdental space.
