

PERFECT WHITE

For brilliant white teeth

Unique whitening elements and the perfectly designed bristle field clean the teeth thoroughly whilst polishing the surface of the tooth at the same time. Regular usage ensures naturally brilliant white teeth.

Unique whitening elements polish the teeth gently and evenly with every application.

Soft microstructures on the back help to remove bacteria from the tongue.

Manual toothbrushes

Finest Swiss Oral Care 

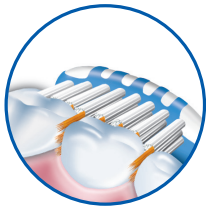

PROFESSIONAL ORAL HYGIENE EVERY DAY

The TRISA Pro line combines functionality with maximum convenience for the daily oral care routine. The perfectly shaped ergonomic handle combined with non-slip materials helps to guide and control the toothbrush optimally whilst brushing the teeth. Designed and manufactured in Switzerland.

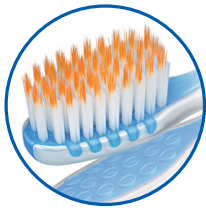

PRO INTERDENTAL

Cleans thoroughly right into the interdental spaces

With the specially designed longer, silky-fine interdental bristles the TRISA Pro Interdental cleans deep into the interdental spaces each time it is used. At the same time, the shorter cleaning bristles remove plaque thoroughly from the surface of the tooth.

Two-level bristles simultaneously clean the surfaces of the teeth and interdental spaces.

Soft microstructures on the back help to remove bacteria from the tongue.

PRO SENSITIVE

For cleaning the teeth gently and effectively

The feather-light extra soft outer bristles and the pleasantly soft inner bristles ensure gentle and efficient cleaning of sensitive teeth. At the same time, the extra soft bristles soothingly stimulate the gums with every use.

The soft bristles gently stimulate the gums.

Specially soft elements protect the gums each time the teeth are cleaned.
